

## TWINKLE TRUST ANIMAL AID®

Charity Registration No. 1091253

Story well told, I will never forget this rescue, from the white cat handed me at the start that had nasty skin cancer across one side of its face, the relief that help had arrived, the mummy cat who I had to hold all my nerve and use all my catching experience to not lose and the wait I did for the others in the car whilst looking out to sea at a cruise ship full of privilege most never realise they have.

The man there had some sad stories to tell, all I could think to say was to tell him he was a good man who had nothing but still gave to the cats.

I hope that having rescued his cats from the situation he will except some help for himself and have reason to move away to the shelter.

Ps the white cat was given the highest level of care as is Twinkle trusts way. Pain killers were given to see it through the night in a box with comfortable blanket and as many licky licks as it wanted to enjoy. It was unable to eat anything else. There was unfortunately no chance of saving it so it' was peacefully PTS ending much suffering.
